

Sizes

To ensure the best quality of ECG signal, the shirt size must be aligned with the athlete's chest size.

The size must be measured under the pectorals (same position as the belt strap). Note: The Wiz HR shirt needs to fit tightly to work correctly. If stuck between sizes, we recommend you to select the smallest of the two sizes.

Size	Chest (cm)	Chest (inches)
XS	< 77cm	< 30"
S	77 – 83cm	30" to 32"
M	84 – 91cm	33" to 36"
L	92 – 102cm	37" to 40"
XL	> 103cm	> 40"

Care

CAUTION.

Do Not Use Dryer Or Hot Water For Washing

- Wet the electrodes before wearing, it will be helpful for heart rate detecting.
- Attach the transmitter to the Conductive Built in Vest. make sure the transmitter is attached to the Vest in right direction.

The diagram shows a person from the waist up wearing a black athletic vest. A rectangular transmitter is attached to the front of the vest, with the word 'SENSORS' printed on it. A line connects the transmitter to a faucet on the right. The faucet is dripping water, and two arrows point upwards from the water towards the transmitter, indicating that the sensors should be wetted before use.
