Off

Charging your INFINITY

The battery provides 15 hours of autonomy in the default configuration. It is fully charged in up to 2 hours when using the docking station.

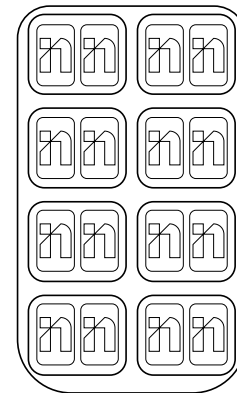

LED lights behavior during charging

While charging,
LED lights blink blue.

When fully charged,
LED lights turn steady green.

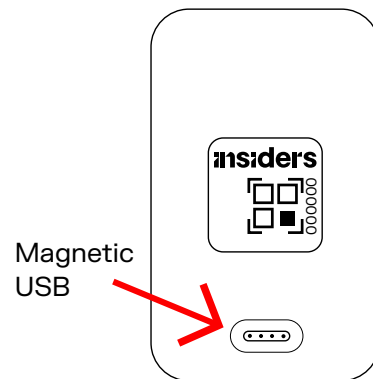

Docking

Using the docking station

1. Make sure the devices are correctly placed in the charging slots
2. Power on the docking station with the provided power supply

Using the magnetic USB cable

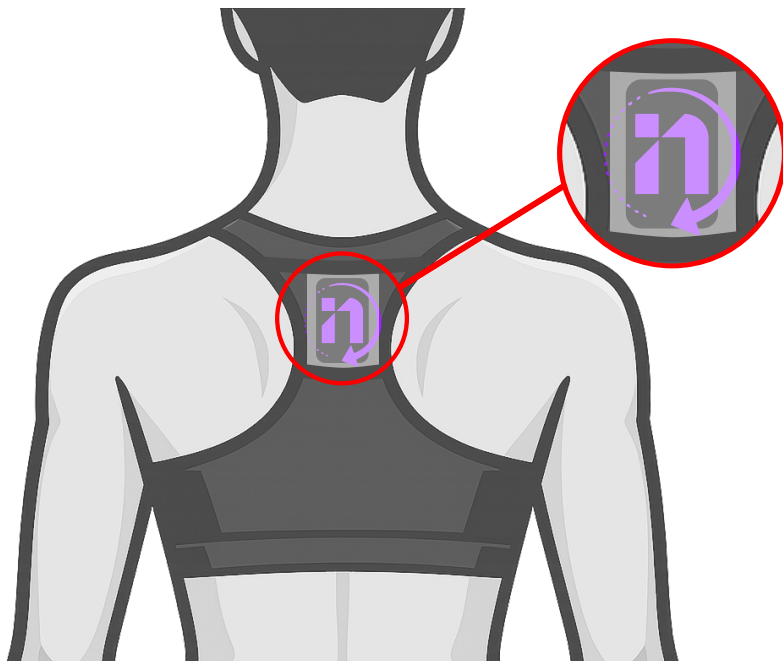

1. Plug the provided magnetic USB cable into the device
2. Then connect the other end to a computer or any USB power source

Back of the device

Correct positioning

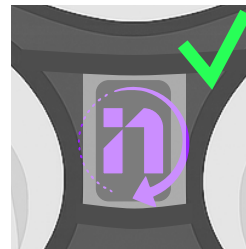

For proper device operation, ensure that it is correctly positioned on the athlete and that the LED lights are blinking purple in a circular pattern. When properly positioned, the "N" logo should appear in the correct orientation, and you should see the LED lights pulsing.

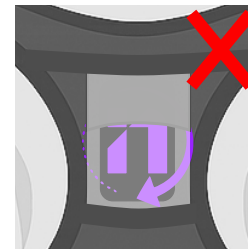

Caution: To ensure your INFINITY stays securely in place in the pocket, make sure to place the tab at the top of the pocket over the device.

Warnings

- Use the INFINITY only as directed in the User Manual.
- Do not disassemble the device.
- Protect the device from damage. Do not drop it or expose it to extreme heat or excessive exposure to direct sunlight.
- Keep the device in a clean, dry place at room temperature.
- Avoid scratching the device.
- Waterproof: Resistant to exposure to clear, fresh water under the conditions specified by the manufacturer.
- The device can be used at the water surface. Do not fully submerge it for extended periods.
- Do not expose the device to salt water for extended periods.
- Do not connect the USB cable to the device or charge it on the docking when it is wet. The device must be completely dry before charging or connecting the USB cable.
- If the device has been exposed to salt water, rinse it thoroughly with clear, fresh water. Then ensure to dry it completely before any further use or handling.
